Fellows are expected to remain within all of the ACGME duty hour limits. All fellows and faculty are expected to monitor trainee physicians for signs of fatigue. Fellows are also expected to self-monitor. When fellows are identified as fatigued, the attending physician and program director must be notified as soon as possible. The attending physician or program director will relieve the fellow of his/her responsibilities, with the attending physician serving as the immediate replacement. The attending physician or program director must evaluate the fatigued fellow to assess what else needs to be done to assist the fellow, such as the designated driver “Scooter Guy” service, and when duty should be resumed.
