The current policy for the process of House Staff, Faculty and Program evaluations is as follows:

**Evaluating House Staff:**
The VNR (Vascular Neurology Resident) is evaluated through an electronic system and paper copies. The electronic system, New Innovations, will automatically send an evaluation to the faculty member(s) who were on the same rotation as the resident. The evaluation lists the six competencies (Patient Care, Medical Knowledge, Practice-Based Learning Improvement, Interpersonal and Communication Skills, Professionalism, and System-Based Learning). Once the evaluation has been completed by the faculty member(s), the evaluations are reviewed and printed off by the program coordinator. The evaluations are then placed in the resident file. The resident also has access to review their evaluations in New Innovations. The paper copies are given to the nurses for their input. These evaluations are sent back to the program coordinator via campus mail.

**Evaluating the Faculty:**
The VNR (Vascular Neurology Resident) has the opportunity to anonymously evaluate the faculty twice a year using the New Innovations system. These evaluations are printed and given to the Vascular Neurology Program Director who reviews them with the VNR and then returns them to the program coordinator either by campus mail or dropping them off at the coordinator’s office. The program coordinator shares the faculty evaluations with the Chairman of Neurology and the designated faculty member.

**Evaluating the Program:**
The residents have the opportunity to anonymously evaluate the program at the end of the academic year using the New Innovations system. The program evaluation is printed off by the program coordinator and then reviewed by the Program Director and also reviewed at the Annual ACGME Education Meeting.

**Faculty Evaluating the Program:**
The faculty has the opportunity to evaluate the program at the end of the academic year using the New Innovations system. The program evaluation is printed off by the program coordinator and then reviewed by the Program Director and also reviewed at the Annual ACGME Education Meeting.
